Supplier Spotlight on...

Lewisburg Printing Company

Founded in 1898, Lewisburg Printing Company (LPC) is now in its fourth generation of family ownership. The company is an industry leader with its core business in high quality specialty printing that includes large and small format litho, topsheet, commercial, flexo and digital printing. LPC proudly serves local, national and international clientele from the corrugated packaging, point of purchase, retail, manufacturing, food processing, service and educational markets.

There are four strategic priorities at LPC: our customers, our employees, technology and growth.

First and foremost, we are a customer-driven company. LPC takes pride in the ability to exceed customer expectations. This is commonly used terminology in virtually every industry and it's no different in the printing industry. However, LPC takes this commitment very seriously and it shows in customer loyalty and retention. The feedback we consistently receive from our customers on why they partner with LPC are service, fast turnaround, capability, quality and a competitive price structure. As one of our valued customers recently stated, "LPC has consistently demonstrated the ability to provide quality work at a competitive price while continuing to meet our customers demanding schedule."

LPC has a staff of approximately 100 people working together to achieve a common goal. Our goal is to build strong relationships with our customers, suppliers, colleagues and employees through mutual respect and trust. We have an excellent team and each member plays an important role in our success. LPC is committed to continuous improvement through technology and training. In 2004, LPC started its large format

division. Over the past seven years, this division has emerged as our primary market focus. "The investments we have made in printing technology further validate our commitment to long-term growth. This allows our organization to be as efficient as possible in an increasingly competitive market," said Hale Hawkins IV, CEO.

Recent equipment investments include a new 73-inch Man Roland 900 XXL, a new 56-inch Mitsubishi Diamond with UV Coating, a new Indigo 5500 Digital Press, a 90-inch Seybold cutter and a new VLF Magnus Platesetter. Additionally, LPC installed an inhouse ink kitchen in 2010, as well as gaining certification as a G7 Master Printer. LPC is also a certified chain of custody supplier for FSC, SFI and PEFC certified products.

A new 73-inch Man Roland 900 XXL printer is one of LPC's most recent investments.

Finally, LPC is committed to growth within existing and new markets. We have and will continue to make the investments in equipment and personnel to increase our presence throughout the United States. "Our goal is to get the word out about LPC. We have a lot to offer and will continue working hard to earn additional market share moving forward," said Kirk Kelso, Vice President, Sales.
