

LPC Expands Capability with New Mitsubishi 56" UV Press

NEW MITSUBISHI 56" PRESS WILL INCREASE CAPACITY AND CAPABILITY

Lewisburg, Tennessee, April 13, 2011 --

LPC has enhanced its large format division with the purchase of a new 56" Mitsubishi Diamond 6000LX. The new press is six color with aqueous in-line tower coater, UV and a Mitsubishi Diamond Series system.

"The new Mitsubishi further validates LPC's commitment to long term growth through the investment in printing technology. This allows our organization to be as efficient as possible in an increasingly competitive market." said Hale Hawkins, IV, LPC CEO.

Equipment specifications for the Mitsubishi Diamond 6000LX 41" x 56" press:

- Six color plus UV or Aqueous Coating
- Minimum Sheet: 23-5/8" x 33-15/32"
- Maximum Sheet: 40-1/2" x 56-1/2"
- Maximum Image Area (including bleeds): 40" x 56"

"LPC continues to listen to feedback from our customer base. The addition of UV capability will enable us to offer additional value to existing customers while maintaining consistent growth." said Kirk Kelso, LPC Vice President of Sales.

Installation for the Mitsubishi began in December 2010. The press is currently in operation with full UV capability available in July 2011.

About LPC

Founded in 1898, LPC now in its fourth generation of family ownership. The company is an industry leader with its core business in high quality specialty printing that includes large and small format litho, commercial, flexo and digital printing.
